

BMP-4000 SCARIFIER

A RIDE-ON HEAVY DUTY SCARIFIER

The Blastrac BMP-4000 is a new heavy duty ride-on sawing (shaving) and milling machine ideally suited for large milling and sawing applications, for example road construction and industrial flooring. The BMP-4000 is a multifunctional machine. By changing the hydraulic motor you can easily swap the milling and the sawing technology. It has a double, hydraulic micrometric adjustment to set the working depth, to work very precisely and eliminate the risk of underground deterioration. Due to its increased weight it allows you to generate more efficient and precise sawing and milling actions.

MILLING 400 MM
SAWING 380 MM

300 RPM | SCARIFYING
1180 RPM | SAWING

1995 MM | 840 MM | 1550 MM

HYDRAULIC | 0-45 M/MIN

1550 KG

RIDE-ON

30 KW | 400 V | 50 HZ | 32 A

SURFACE:
CONCRETE / STONE / ASPHALT

USER FRIENDLY

Easy to manoeuvre, minimum vibrations and everything you need to control the machines is within arm's reach. The handles and lifting eyes make it easy to transport.

CENTRED DOWN FORCE

All Blastrac scarifiers are built in a way that all the weight of the machine is centred in order to create a maximum down force on the rotating drum.

LATERAL DRUM LOADING

Blastrac scarifiers are especially designed so that the drum can easily be pulled out of the machine from the side, without having to move the machine.

PRECISE HEIGHT ADJUSTMENT

The working depth of the drum with cutting / milling tools is easily adjustable, and precise to the millimetre. This means no underground deterioration.

ELECTRIC OR PETROL

All our scarifying models come in an electric or a petrol/diesel version to give you even more versatility.

GREEN TECHNOLOGY

Our scarifiers, like any other Blastrac machine, do not use any chemicals or waste valuable drinking water.
